### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period **will** apply and **will** expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply **will**, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 19-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pounds in view of Baker.

Pounds shows the apparatus for furrow opening, including a first disc 22A and a second disc 22B.

The claims distinguish over Pounds in requiring the discs to have teeth.

Baker shows teeth 10a on a disk 10.

Art Unit: 3641

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the discs 22A and 22B with teeth as shown in Baker for easier soil penetration.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pounds in view of Stephens et al.

Pounds shows the apparatus for furrow opening, including a first disc 22A and a second disc 22B.

The claims distinguish over Pounds in requiring the discs to have teeth.

Stephens et al. show teeth 86 on disks 70,72.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the discs 22A and 22B with teeth as shown in Stephens et al. for easier soil penetration.
